

**GOLF BALL HAVING A CONTROLLED WEIGHT DISTRIBUTION ABOUT
A DESIGNATED SPIN AXIS AND A METHOD OF MAKING SAME**

5

ABSTRACT OF THE DISCLOSURE

A golf ball is provided having a controlled weight distribution about a designated spin axis. The golf ball includes a core defining one or more high density regions interiorly disposed along a common plane and centered about the horizontal spin axis of the ball. As a result of the controlled weight distribution, the resulting ball significantly reduces hooks and slices. A method of manufacturing and/or utilizing the present golf ball is also provided.
